Focus on E-mobility

As Power Electronics is a prerequisite for e-mobility technologies of the future, the PCIM Europe 2018 will be featuring a large specialized exhibition area dedicated to this topic.

This is the place to visit to receive an overview of products and components specifically designed for the requirements of this relatively new application in power electronics.

The adjoining forum, organized in cooperation with the »Elektronik automotive« trade magazine, offers a variety of presentations and panel discussions on current trends and developments along the entire e-mobility value chain.

Event profile

PCIM Europe is the leading international exhibition on power electronics, intelligent motion, renewable energy and energy management. The event offers an extensive, contemporary overview of the range of services and products in this field.

With more than 450 exhibitors, three exhibition forums and an international conference, the PCIM Europe offers a perfect platform for networking and technical discussions.

For a current list of the exhibiting companies please visit pcim-europe.com/exhibitorlist.

exhibition

Exhibition topics

- Power semiconductors, components and modules
- Integrated circuits
- Passive components
- Coil and magnetic materials
- Thermal management
- Sensors
- Assemblies and subsystems
- Electrical drives
- Power converters
- Power quality and energy storage
- Test and measurement
- Development software
- Information and services

Exhibition forums

Platform for knowledge transfer: the Industry Forum

Would you like to know what's new in the industry? The Industry Forum in hall 6 offers a top-notch program of presentations and panel discussions on current trends and developments in the industry. Look forward to the following topics, among others:

- **SiC Solutions for Industrial and Automotive Applications**
Aly Mashaly, ROHM Semiconductor
- **From Niche to Mainstream – SiC Power Devices as Enabler for Revolutionary Designs**
Peter Friedrichs, Infineon
- **Electric Vehicles Charging – An Ultrafast Overview**
Drazen Dujic, Power Electronics Laboratory, EPFL
- **New Passive Devices in Power Conversion – Nice to Have or a MUST**
Petar Grbovic, Huawei
- **GaN and SiC Devices for Future Design**
Bodo Arlt, Bodo's Power Systems

Platform for product presentations: the Exhibitor Forum

Would you like to know what products will be launched in the near future? At the Exhibitor forum in hall 7, exhibiting companies showcase their latest product innovations.

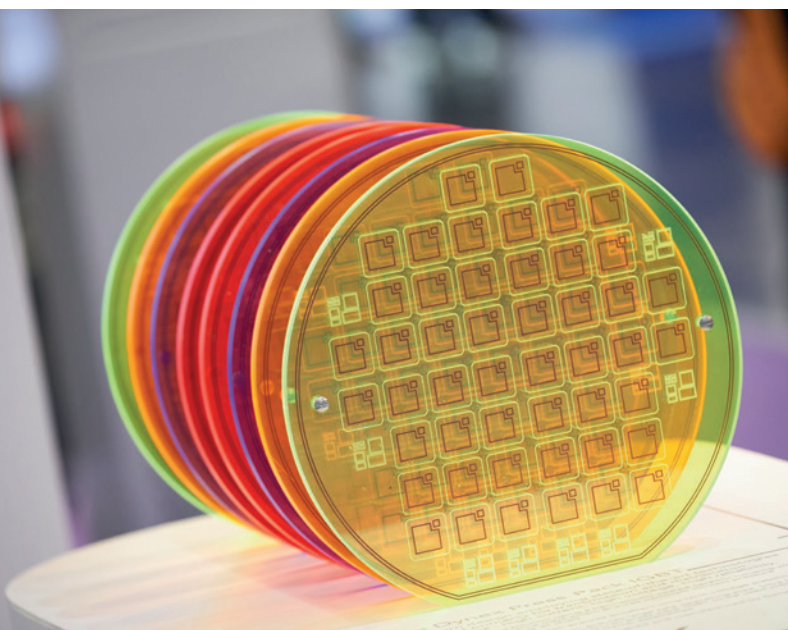

- Look forward to presentations by **Fuji Electric, Rohde & Schwarz, Semikron, Vacuumschmelze** and many more.
